WEB APPLICATION DEVELOPER

Full-stack web developer specializing in Angular and scalable web application architecture. Experienced in building and maintaining RESTful services using NestJS with SQL Server and PostgreSQL. Strong proficiency in TypeScript and JavaScript, with a focus on clean code, performance, and reliability. A collaborative team member with solid problem-solving skills and the ability to quickly adapt to new technologies and project requirements.

SKILLS

Front-end:

Angular | React | TypeScript | JavaScript | SCSS | Bootstrap | RxJS | ThreeJS | jQuery

Back-end:

NestJS | REST API | JWT Authentication | SQL Server | PostgreSQL | .NET Core (self-learning)

Tools & Practices:

Git / GitHub / GitLab | Docker | Postman | Adobe XD

Agile Workflow | Modular & Reusable Code | Performance Optimization

PROFESSIONAL EXPERIENCE

Full-Stack developer

Jan 2025 - present

Freelancer

- Designed and implemented full-stack applications with Angular front-end and NestJS back-end, integrating SQL Server and PostgreSQL databases.
- Built reusable Angular components and services, improving development speed by 30%.
- Developed secure authentication systems using JWT, refresh tokens, and role-based authorization.
- Implemented RESTful APIs, including data validation, error handling, and relational database integration.
- Self-learning and experimenting with .NET Core APIs for additional back-end capabilities.

Angular Developer

Aug 2023 - Dec 2024

BA-Tech

- Built the company website using Angular framework, including Pedia page to showcase technology news and articles, while leveraging advanced features like pipes, directives, and other built-in Angular libraries.
- Collaborated with a team to develop a server-integrated application using Angular services, built-in, and third-party libraries, ensuring on-time delivery.
- Gained expertise in advanced application management, product development, and Git repository administration through developing an application with complex functionality.
- Designed and managed an advanced application with sophisticated UI interfaces and complex logic, implementing authorization by connecting to back-end APIs.
- Created reusable UI components using Angular libraries, reducing development time by 30%.

BA-Tech

- Created UIs leveraging front-end technologies and JavaScript libraries such as ThreeJS.
- Designed UI/UX solutions with Adobe XD to improve product usability.
- Managed version control and facilitated collaborative development using GitHub and GitLab.
- Developed dashboards for company products, enhancing REST API integration and advanced UI such as pagination, filters, sorts, charts and other UI components.
- Implemented real-time logging of MQTT messages in compliance with server standards using jQuery and Ajax and sorted the messages by their status within a dynamic table.
- Worked on projects involving data exchange with Arduino, utilizing JSON and APIs for smooth communication with the Arduino CPU and control the output.
- Designed a landing page and an advanced wizard form with offline libraries which I developed, enhancing user experience and accessibility from a local offline server.

EDUCATION

Bachelor in Mechatronics engineering

Damascus University
Sep 2021

Bachelor in information technology

Syrian Virtual University
Oct 2024

LANGUAGES

Arabic
Mother tongue

English
Intermediate - **B2**
